Figma, FigJam, Claude Code, Notion,
Adobe Creative Suite

LANGUAGES

Spanish (native) · English (fluent)

EDUCATION

Google UX Design Professional Certificate

2026

ITESO

B.Arch., Architecture, 2021 ·
Diploma in Landscape
Architecture, 2023

Western Michigan University

International Exchange
Program, 2019

SUMMARY

Product Designer with a background in architecture and business operations, focused on turning complex workflows into clear, usable digital experiences. At Sonovit, designed and shipped internal healthcare tools and customer-facing experiences, working across research, UX/UI, prototyping, testing, and implementation.

EXPERIENCE

Sonovit

Product Designer & Operations Lead

May 2023 – Present

Audiology clinic network · Guadalajara & Zacatecas

- Designed, built and shipped an internal audiology reporting tool that reduced report preparation time by **~67%**, from 45–60 minutes to 15–20 minutes, saving approximately **21 staff hours per month** across two clinics.
- Redesigned a fragmented multi-step reporting workflow into a single guided process, automating report generation, chart creation, formatting, and PDF export while reducing recurring completeness and formatting issues.
- Ran discovery and validation with audiologists, front-desk staff, and clinic ownership, translating competing clinical and business requirements into a tool adopted at both locations.
- Redesigned Sonovit's customer website around real patient questions and conversion friction, restructuring information architecture, service discovery, and appointment flows.
- Led a one-month rollout of a digital clinic-management platform to six staff members across two locations, coordinating requirements, data migration, training, and adoption.

Independent Design Practice

Architecture, Interiors & Landscape

2023 – Present

- Delivered **8 built projects** across residential, workplace, and healthcare environments, leading client requirements, design, vendor coordination, and on-site execution.

Ibarra Barragán — IBGO

Project Architect

May 2021 – Mar 2023

- Led design and documentation for three luxury residences and a commercial production facility, translating ambiguous client requirements into buildable solutions under technical and budget constraints.
- Coordinated engineers, contractors, suppliers, and junior team members from concept through delivery, resolving design, technical, budget, and construction constraints.
